ZIDIO Onboarding Session

Attachments  ZIDIO Onboarding Session

Meeting records  Recording

Summary

Organizational vision and internship structure presentation included logistical operational details and upcoming platform assessment requirements.

Company Vision and Framework

The organization prioritizes bridging educational gaps through a 3-layer internship model focusing on learning, execution, and professional opportunities.

Collaborative project teams of 5 to 7 members utilize a centralized dashboard for all workflows.

Financials and Operational Logistics

Workspace activation fees are refundable upon program completion, with stipends ranging from 1,000 to 12,000 available based on performance. Standard work schedules run Monday to Friday with evening training sessions.

Dashboard Management and Assessment

Participants must complete dashboard profiles for professional credibility while preparing for a mandatory 30-minute baseline assessment on August 20. This evaluation tailors future training content to specific skill levels.

Next steps

- ☐ [The group] Update profile: Add a profile picture and update contact information including phone number on the dashboard to complete the public profile.

- ☐ [The group] Complete baseline test: Participate in the baseline assessment scheduled for 8:00 p.m. on August 20 to determine skill levels for internship placement.
- ☐ [The group] Accept internship offer: Confirm acceptance of the internship offer via the platform before the specified deadline.

Details

Did the screenshots in this section make your notes [better](#) or [worse](#)?

- **Company Introduction and Vision:** Admin hirre.io introduced the organization, J Development Private Limited, a product-based software development company that focuses on bridging the gap between theoretical education and industry requirements. The company operates globally with a remote team and aims to transform aspiring learners into industry-ready software engineers by providing practical development experience, project exposure, and collaborative environments rather than just theoretical training.

- **Internship Framework and Structure:** The internship program is designed around a three-layer model: the learning layer, the execution layer, and the opportunity layer. The learning layer provides technical training and domain-specific knowledge; the execution layer involves working on real

codebases, participating in code reviews, and handling deployments; and the opportunity layer focuses on career pathways, including full-time and freelance projects.

- **Internship Schedule and Working Hours:** Interns are expected to work Monday through Friday, while weekends are off. Training sessions are scheduled after 6 p.m. to accommodate participants who have daytime classes or professional commitments. These sessions occur three to four times per week, last approximately one hour, and recordings are available on the dashboard for anyone who misses a live session.
- **Project Management and Team Collaboration:** Projects are collaborative, and participants work in teams of five to seven members. The dashboard serves as the central hub for managing assignments, viewing project documentation, and tracking progress. Project submission windows open five days before the deadline, and all work, including GitHub repositories, must be submitted through the dashboard for review by mentors.
- **Financial Details and Stipends:** There is a required workspace activation fee to provide participants with necessary resources, platform access, and training tools; however, the company offers a refund of this amount along with a stipend upon successful completion of the internship. Stipends range from 10,000 to 12,000 and are provided on a monthly basis, with performance evaluated individually based on criteria such as project quality, attendance, monthly assessments, and submission completeness.

- **Dashboard Profile Management (Task One):** Participants are required to complete their user profile on the dashboard, which also functions as a public professional profile for recruiters. This profile includes sections for work experience, skills, and projects. Admin hirre.io emphasized that participants should update their profile with a picture and configure privacy settings to enable phone numbers and emails, as this profile is used to connect with team members and apply for future job opportunities.
- **Dashboard Version 2 Updates:** Admin hirre.io provided a preview of the upcoming dashboard version 2, which includes enhanced features such as a community section, performance reporting, and a verification system. One notable addition is the "blue check" verification mark, which is awarded to participants who complete their profile steps, thereby increasing their credibility with recruiters.

- **Baseline Assessment (Task Two):** As the second required task before the internship begins tomorrow, Admin hirre.io announced a baseline assessment scheduled for August 20th at 8:00 p.m. This test consists of 30 multiple-choice questions to be completed in 30 minutes, and the results are used to tailor the live training program to the participants' skill levels rather than affecting their internship status.

- **Closing and Official Support:** Admin hirre.io concluded the session by taking a snapshot of the participants for official records and reminding them to ensure their offer is accepted. For any further queries or issues, participants are directed to contact the support team via the official WhatsApp channel, which is available 24/7.
